

The population of frogs in a pond ecosystem is increasing. The population of flies will most likely do what?

Answer:

The population of flies will most likely decrease significantly until the balance is achieved again. The increase of frogs will trigger their predators' population as a consequence and the frogs' number will be reduced, then the frog predators won't have enough frog and will move to the next pond. Then the flies' numbers will increase, and the cycle will repeat itself.

Explanation:

First of all, we need to understand something, ecosystems will always produce life and if the balance of predators and prey is broken. Life will find its way. As I have said before, the number of flies will trigger significantly the number of predators, in our case, the decrease of flies will be solved by the increase of frog predators that the ecosystem will get. Then, when there are enough frog predators to reduce the number of frogs to a very tiny level in which predators have to leave to find another pond. The population of flies will recover its staggering numbers.

Decrease because the frogs will eat more with it being a larger population

What's 45.678 in expanded form

The waitress and the hostess at a restaurant share the tips at the end of the shift. The average amount earned in tips between the two of them is \$50. The waitress gets \$30 and the hostess gets \$20. If they continue to earn money at this rate, how many dollars will the waitress receive if they earn \$200 at the end of the shift?

A. \$100 B. \$120 C. \$133 D. \$122

Cabeza de Vaca's primary purpose for writing La Relacion was it? A. reflect

B. Inform

C. instruct

D. persuade

At the beginning of World War 1, what was the relationship between Austria and Serbia

How many protons, neutrons, and electrons are present in an atom of aluminum-27?

16-fl oz bottle of juice cost \$2.00. What is the unit cost? A. \$0.075/fl oz

B. \$0.125/fl oz

C. \$0.36/fl oz

D. \$0.40/fl oz

If 339 is divided by 6, what is the remainder?

Choose the item that uses a comma or commas correctly. Choose one answer. Group of answer choices A. You? don't have to go to Shanghai or Hong Kong to get great Chinese food for there is probably a? fine, Chinese restaurant right in your town.

B. You? don't have to go to Shanghai or Hong Kong to get great Chinese? food, for there is probably a fine Chinese restaurant right in your town.

C. You? don't have to go to Shanghai or Hong Kong to get great Chinese food? for, there is probably a fine Chinese restaurant right in your town.

. During diffusion molecules tend to move _____ A. up the concentration gradient B. down the concentration gradient C. from an area of lower concentration to an area of higher concentration D. in a direction that doesn't depend on concentration

How did the rise of big business in the United States transform the economy and affect the lives of working people? chapter 17

02.07) classify the expression $7x^3 - 2x^2$ as a monomial, binomial, trinomial, or polynomial. (1 point) monomial binomial trinomial polynomial
