!!!!help!!!! i have a spanish test in 2 days and i cant remeber the months. i also cant remember the questions like where, when how, why, who, what, and which. please help.

How is the linear charge density of a uniformly charged ring related to total amount of charge The linear charge density is the ratio of the total charge to the diameter. The linear charge density is the ratio of the diameter to the total charge. The linear charge density is the ratio of the total charge to the circumference. The linear charge density is the product of the total charge and the diameter.

What was probably the major cause of the beginning of the baby boom?

Read "Sonnet 73" by William Shakespeare: That time of year thou mayst in me behold

When yellow leaves, or none, or few, do hang

Upon those boughs which shake against the cold,

Bare ruin'd choirs, where late the sweet birds sang.

In me thou seest the twilight of such day

As after sunset fadeth in the west;

Which by and by black night doth take away,

Death's second self, that seals up all in rest.

In me thou see'st the glowing of such fire

That on the ashes of his youth doth lie,

As the deathbed whereon it must expire

Consumed with that which it was nourished by.

This thou perceiv'st, which makes thy love more strong,

To love that well which thou must leave ere long.

Which excerpt best develops the theme that it is important to be surrounded by people you love when you get older?

A. To love that well which thou must leave ere long.

B. Upon those boughs which shake against the cold, / Bare ruin'd choirs, where late the sweet birds sang.
