

When strong solar winds are displaced poleward by our magnetic fields, we get sunspots. hurricanes in the tropics. droughts and dust bowls in the american west. intense auroral displays. the van allen radiation belts?

We get intense auroral displays.

Doughnuts can be placed into three categories; glazed, filled, and cake doughnuts. Most popular are the glazed doughnuts, which are made with yeast and sweet dough. They are dipped in a sweet glaze or covered with icing, usually chocolate or vanilla. Filled doughnuts are usually made with yeast, too. The light density permits them to be inserted with a number of different fillings for extra sweetness and flavoring. The filling options include vanilla cream, chocolate cream, pudding, custard, and jellies. These filled desserts are formed into either a round or oblong shape without the center hole. Cake doughnuts are another favorite variety. They are the densest and heaviest pastry of the doughnut family because they are not made with yeast. These treats derive their name from their cake-like density. In addition, the name is appropriate because of the popular cake toppings used on them, such as confetti sprinkles, frosting striping, coconut, and chopped nuts. Which statement best summarizes paragraph four of this selection?

- A) Glazed, filled, and cake are the three categories of doughnuts.
- B) Glazed, filled, and cake doughnuts are made with yeast in America.
- C) The three categories of doughnuts are determined by their shape and taste.
- D) The three categories of doughnuts are glazed, filled, and cake; they are named by their characteristics and ingredients.

A testing instrument that's used to measure electrical signals in a circuit and display them as waveforms on a screen is called a/an A. oscilloscope. B. signal generator. C. multimeter. D. power supply.

One who instigates conflict might be called a "problem solver"?

How are stem cells currently being used in the laboratory

Explain why any of the four operations (+x +) placed between the two terms 5 and $\sqrt[3]{8}$ will result in an irrational number. Please help me!!! It's due today

How do the elements in the Noble Gas family compare?

$2x + 6y + 3x^2 + 7y + 14x$.

Nutrients and water from digested food is absorbed by the ____ ?

It costs \$80 to take a bus tour to Europe. This is four times as much as it costs to take a bus tour in Mexico City. How much is the bus tour of Mexico City?

What did Booker T. Washington urge African Americans to focus on in his speech at the 1895 Atlanta Exposition? causing civil disorder to achieve social justice

emigrating from the United States to Africa

advancing themselves through education

improving their representation in politics

Consider two people where one person is 20% taller than the other but proportioned in exactly the same way.? (That is, the taller person looks like a larger version of the shorter? person.) Suppose the shorter person has a 36?-inch waist. What size is the taller? person's waist?

How did slave labor during to the Punic Wars affect small farmers?

When did the Dell Inspiron 11 come out?

Find the circumference and area of a circle with a diameter of 26 meters. Leave your answers in terms of π

Which one of the following is not a method used by companies to accelerate cash receipts? Offering discounts for early payment Accepting national credit cards for customer purchases Writing off receivables Selling receivables to a factor

The LCM of 6 and 10 is _____.

A research colleague has provided you with a single cell to identify. briefly describe the steps you would take to determine which domain this cell would most likely belong to.

assume that grade is a variable whose value is a letter grade-- anyone of the following letters: 'A', 'B', 'C', 'D', 'E', 'F', 'W', 'I'. Assume further there are the following int variables, declared and already initialized: account, bcount, ccount, dcount, ecount, fcount, wcount, icount. Write a switch statement that increments the appropriate variable (account, bcount, ccount, etc..) depending on the value of grade. So if grade is 'A' then account is incremented; if grade is 'B' then bcount is incremented and so on.
