

**Abby plans to purchase pencils as prizes for the school fair. The pencils cost \$11.52 per case or can be purchased individually. With her available money, Abby can either buy ten cases of pencils and eight individual pencils or she can buy 1160 individual pencils. In either situation she will not have any money remaining after the purchases. How much money does Abby have?**

$(11.52 \times 10) + 8x = 1160x$ , so  $115.2 = 1160x - 8x = 1152x = \text{so, } x = 115.2 / 1152 = .1$  So, that means she has  $(1160 \times .1) = \$116.00$  Answer = \$116

ANSWER PLZ - QUESTION 13 Remplace le nom de l'objet en gras (in CAPS) par un pronom. Ecris toute la phrase. Nous avons acheté **DES RIDEAUX** pour la salle de séjour.

QUESTION 14
