

What motivates most immigrants to come to the united states today -they are escaping communist countries
-they want a better life for themselves and their families
-they are hoping to receive free land grants
-they want to learn about american society to form new gov'ts in their home countries.

They want a better life for themselves and their families.

Throughout history, this has been the reason for immigrants coming to America. The quote imprinted on a plaque at the Statue of Liberty says it well: "Give me your tired, your poor, your huddled masses yearning to breathe free." America is seen as the land of opportunity to build a life better than where they had been before.

(The quote on the Statue of Liberty plaque, by the way, comes from the poem, "The New Colossus," which was written by American poet Emma Lazarus in 1883 as part of an effort to raise money for the construction of a pedestal for the Statue of Liberty.)

Which body system is an important place for mineral storage, gives us support and structure, and provides a place for muscle attachment? A) muscular

B) nervous

C) skeletal

Distributive property for 144 divided by 8 (5th grade)

How many moles of atoms are in 6.00 g of ^{13}C ?

Navi has 3 assignments. The first one takes 20 minutes to do, the other takes 15 minutes, and the last one takes 19 minutes to do. He has 40 minutes to do his homework. If he does his homework at a constant rate of 18 minutes per assignment, but takes a pause between them for 5 minutes, will he finish all of them?

Explain your reasoning.

Read the following excerpt from the Declaration of Independence: When in the Course of human events, it becomes necessary for one people to dissolve the political bands which have connected them with another ... a decent respect to the opinions of mankind requires that they should declare the causes which impel them to the separation....

That whenever any Form of Government becomes destructive of these ends, it is the Right of the People to alter or to abolish it, and to institute new Government, laying its foundation on such principles and organizing its powers in such form, as to them shall seem most likely to effect their Safety and Happiness. ... The history of the present King of Great Britain is a history of repeated injuries and usurpations ... To prove this, let Facts be submitted to a candid world.

He has refused his Assent to Laws, the most wholesome and necessary for the public good.

How do the authors of the Declaration best use deductive reasoning to support the idea that the colonists have a right to form a new government?

A. They first establish the widely accepted belief that governments derive their power from the people.

B. They list the colonists' grievances against the British monarchy, starting with the king's refusal to "Assent to Laws."

C. They first establish the idea that declaring one's intentions is a decent and expected measure.

D. They follow his initial statement by pointing out that the colonists do not take these measures lightly.

$4(2x - 5) + 15 = 11$ Write the steps you will use to solve the equation and explain each step.

29,27,24,20,15... whats next

How do I solve $13n-5=10n+7$

a pack of cinnamon scenes pencils sell 4.00 what is sales tax rate is the total cost of the pencils is 4.32

Julia is a writing research paper about vegetarianism, and she has several potential research questions. Which is her best option?

Jed made 2 freethrows in 5 seconds.how many would he make in a minute?

Which anatomic position has the patient lying at an angle instead of lying flat or directly on their side?

David's family is driving from New York to Florida. They know the distance they will travel is about 1100 miles. If a map has a scale of 1 in. = 80 mi, about how far will the trip be on the map?

Your friend's baby was sleeping through the night a couple of months earlier. Now she is waking up quite a bit at night. This is not only frustrating, but also

concerning. She knew that you took a developmental course and wants to know if you have any ideas. What do you tell her?

If there is 64 mi/h what is that in ft/sec

What are three assumptions of the cell theory?

Correct=Brainliest! Which two types of air masses would likely form a subtropical jet stream?

Warm and cool air masses meeting near the North Pole

Cool and warm air masses meeting near the equator

Multiple warm air masses meeting near the equator

Two or more cool air masses meeting near the South Pole

Tony rented a truck for one day. There was a base fee of \$15.00, and there was an additional charge of 10 cents for each mile driven. The total cost, C (in dollars), for driving x miles is given by the following function

$$C(x) = 15.00 + 0.10x$$

What is the total rental cost if Tony drove 40 miles?

1. [Home](#)
2. [More Solution](#)
