

Plss help! Asap! will give brainlist! Thx
Write one example of a linear function and one example of a non-linear function in the format: $y=mx +b$

Answer:

Step-by-step explanation:

Linear Function= $y=3x-2$

Non-linear function - $y=x^2$

A non linear function look like a curve when graphed, It has a variable slope value and The input and output of a non-linear system is not directly related

A linear Function A simple linear equation is of the form: $y = mx + c$

, A linear equation looks like a straight line when graphed., It has a constant slope value and The output of a linear system is directly proportional to its input.

Differentiate between ‘participatory leadership style’ and ‘autocratic leadership style’

Factor $x^2+3xy+2y^2+4x+7y+3$

Which of the following statements is NOT a disadvantage of the regular payback method? a. Ignores cash flows beyond the payback period.

b. Does not directly account for the time value of money.

c. Does not provide any indication regarding a project's liquidity or risk.

d. Does not take account of differences in size among projects.

e. Lacks an objective, market-determined benchmark for making decisions.

Members of Dadaist artistic movement believed that world war 1 had been caused by

What are the 3 properties of magnetics

11 more than a number q is negative 15

What did Copernicus and Galileo have in common? Both of them published works that challenged the views of the Church.

They both believed in the geocentric theory of the universe.

They were both imprisoned by the Church.

Neither of them could test out their ideas about the universe.

Three album downloads cost \$36. How much do 5 album downloads cost?

PLEASE HELP ASAP!!! 98 POINTS AND BRAINLIEST!!! What evidence supports the law of conservation of energy?

Chemical energy is converted to light energy during photosynthesis.

Oxygen is made from the breakdown of carbon dioxide during photosynthesis.

Energy is absorbed by chlorophyll during photosynthesis.

Light energy is absorbed by plants and converted to chemical energy.

What were the results of Japan's growing imperialism at the end of the 19th century?

A 6 l volume of ideal neon gas (monatomic) is at a pressure of 3.2 atmospheres and a temperature of 310 K. The atomic mass of neon is 20.2 g/mol. In this situation, the temperature of the gas is increased to 410 and the volume is increased to 8.0 l. The final pressure of the gas, in atmospheres, is closest to:

When fat comes in contact with sodium hydroxide, it produces soap and glycerin. Determine whether this is a physical change or a chemical change. Explain your answer.

What term distinguishes the person who uses hardware or software product from the IT workers who develop, install, service, and support the product?

43 - $w = 8$ what does w equal. how?

Before the Civil War, the Constitution protected slavery

-True

-False

What values of a warrior culture does the passage from the Bhagavad Gita express?

Read the following excerpt from "I Stand Here Ironing" and answer the question. I will never total it all now. I will never come in to say: She was a child seldom smiled at. Her father left me before she was a year old. I worked her first six years when there was work, or I sent her home and to his relatives. There were years she had care she hated. She was dark and thin and foreign-looking in a world where the prestige went to blondness and curly hair and dimples, slow where glibness was prized. She was a child of anxious, not proud, love. We were poor and could not afford for her the soil of easy growth. I was a young mother, I was a distracted mother. There were the other children pushing up, demanding. Her younger sister was all that she was not. She did not like me to touch her. She kept too much in herself, her life was such she had to keep too much in herself. My wisdom came too late. She has much in her and probably nothing will come of it. She is a child of her age, of depression, of war, of fear. What theme is being expressed in the description above? The foolishness of youth. The reality of motherhood. The value of education. The meaning of beauty. NEXT QUESTION

Why did ways of thinking change greatly in Europe between 1350 and 1650
