

# Describe the path of an electrical impulse as it moves through a MOTOR neuron?

The path of movement of electrical impulse starts from the dendrites. Then it passes through cell body, axon, axon terminal and to the dendrites of another neuron through the synapse. Myelin sheath acts as insulator, Nodes of Ranvier are small gaps in axons which facilitate the impulse transfer.

Why was the Louisiana Purchase an important event in American history?

Exercise 9-9 Investment center analysis LO A1 You must prepare a return on investment analysis for the regional manager of Fast & Great Burgers. This growing chain is trying to decide which outlet of two alternatives to open. The first location (A) requires a \$500,000 investment and is expected to yield annual net income of \$80,000. The second location (B) requires a \$200,000 investment and is expected to yield annual net income of \$42,000. Compute the return on investment for each Fast & Great Burgers alternative.

How much power is generated by doing 500 J of work in 30 seconds

A truck driver drove 120 miles in 1 3/4 hours. What is the speed of the truck in miles per hour? PLEASE HELP

Chelsea has 11 times as many art brushes as Monique. If they have 60 art brushes altogether, how many brushes does Chelsea have?

What does it mean a knavish speech sleeps in a/foolish ear

To keep up with rising expenses, a motel manager needs to raise the \$40.00 room rate by 22%. What will be the new rate?

"People of one personality type may view other personality styles in different ways; All the following perceptions may likely be true except:"

Find the zeros of the polynomial function  $f(x) = x(4x-3)(3x+2)$

Please show work thank you
