

Early Christians believed that only God should be worshipped and that problems should not be solved by warfare. Why do you think some Romans felt threatened by these beliefs??

It is because roman's were people who believe in many gods for example Mars and Minerva. When roman's heard that there is only 1 God they were confused, because all their life they have been praising their gods. just imagine someone goes up to your house and asks you to kill someone for him and your a pacifist.

Young bart says to his friend "what do you want to play at recess today, war or forts?" his comrade, yevgeni, replies "why don't we try something different today and play with the girls?" completely aghast, bart yells back "are you crazy?? girls have cooties!" which stage of personality development is bart likely in, according to freud?
